SAFETYDATASHEET

GOUDEY
Quality Stains and Lacquers | Since 1943

1. Product and Company Identification

Product identifier	**W SERIES SOLVENT BASED STAINS – NON REGULATED**
Other means of identification	0113, W200, W201, W210, W215, W218, W231, W233, W234, W235, W236, W238, W239, W240, W241, W242, W243, W246, W247, W248, W249, W250, W251, W252, W253, W254, W255, W354, W355, WS200482, WS201020, WS201520, WS201811
Recommended use	Fast Dry Pigmented Wiping Stains
Recommended restrictions	None known.
Manufacturer information	John E. Goudey Manufacturing Limited 21 Primrose Avenue Toronto, ON M6H 3V1 CA Phone: (416)531-4669
Supplier	See above.
CANUTEC	(613) 996-6666

2. Hazards Identification

Physical hazards Flammable liquids — Category 4

Health hazards
- Skin corrosion/irritation — Category 2
- Serious eye damage/eye irritation — Category 2
- Carcinogenicity — Category 2
- Reproductive toxicity — Category 2
- Specific target organ toxicity, single exposure — Category 2
- Specific target organ toxicity, single exposure — Category 2
- Specific target organ toxicity, repeated exposure — Category 2
- Aspiration hazard — Category 2

Environmental hazards Not classified.

WHMIS 2015 defined hazards Not classified

Label elements

Danger

Signal word Combustible liquid.

Hazard statement
Causes skin irritation.
Causes serious eye irritation.
Suspected of causing cancer.
Suspected of damaging fertility or the unborn child.
May cause respiratory irritation.

Category 3 respiratory tract irritation

Category 3 narcotic effects

Category 1 (central nervous system)

None known.

Category 1

May cause drowsiness or dizziness. Causes damage to organs (central nervous sys exposure. May be fatal if swallowed and enters **Precautionary statement** Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

Prevention Wash thoroughly after handling. Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear protective gloves/protective clothing/eye protection/face protection. Do not breathe mist or vapor. Use only outdoors or in a wellventilated area. Do not eat, drink or smoke when using this product.

Response In case of fire: Use appropriate media to extinguish. IF ON SKIN: Wash with plenty of water. Specific treatment (see information on this label). If skin irritation occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention. IF exposed or concerned:

Storage

Disposal

WHMIS 2015: Health Hazard(s) otherwise classified (HHNOC)

WHMIS 2015: Physical Hazard(s) not otherwise classified (PHNOC) Hazard(s) not otherwise classified (HNOC) Supplemental information Get medical advice/attention. IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON CENTER/doctor if you feel unwell. IF SWALLOWED: Immediately call a POISON CENTER/doctor. Do NOT induce vomiting.

Store in a well-ventilated place. Keep container tightly closed. Store locked up.

Dispose of contents/container in accordance with local/regional/national/international regulations.

None known **not**

None known

None.

3. Composition/Information on Ingredients

4. First Aid Measures

CENTER or doctor/physician if you feel unwell.

Skin contact **attention and special treatment needed**

Eye contact IF ON SKIN: Wash with plenty of water. Specific treatment (see information on this label). If skin irritation occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse.

Ingestion IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention. IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician. Do NOT induce vomiting.

Most important symptoms/effects, acute and delayed Aspiration may cause pulmonary edema and pneumonitis. May cause drowsiness and dizziness. Narcosis. Headache. Nausea, vomiting. Behavioral changes. Decrease in motor functions. Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. May cause respiratory irritation. Skin irritation. May cause redness and pain. Prolonged exposure may cause chronic effects. Treat patient symptomatically.

Indication of immediate medical

Inhalation IF INHALED: Remove person to fresh air and keep comfortable for breathing. Call a POISON

Mixture

Chemical name	Common name and synonyms	CAS number	%
Benzene, ethyl-		100-41-4	1-5*
Carbon black		1333-86-4	0.1-1*
Ferric oxide		1309-37-1	1-5*
Heavy aromatic solvent naphtha (petroleum)		64742-94-5	45-70*
Hydrous magnesium silicate		14807-96-6	0.1-1*
Naphtha (petroleum), heavy alkylate		64741-65-7	0.1-1*
Silica, amorphous, fumed, crystalline free		112945-52-5	0.1-1*
Solvent naphtha (petroleum), medium aliphatic		64742-88-7	1-5*

Stoddard solvent 8052-41-3 0.1-1*

Xylene 1330-20-7 10-30*

All

concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Composition comments *CANADA GHS: The exact percentage (concentration) of composition has been withheld as a trade secret.
US GHS: The exact percentage (concentration) of composition has been withheld as a trade secret in accordance with paragraph (i) of §1910.1200.

General information IF exposed or concerned: Get medical advice/attention. If you feel unwell, seek medical advice (show the label where possible). Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves. Show this safety data sheet to the doctor in attendance. Avoid contact with eyes and skin. Keep out of reach of children.

5. Fire Fighting Measures

Suitable extinguishing media Water fog. Foam. Dry chemical powder. Carbon dioxide.

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

Specific hazards arising from the chemical The product is combustible, and heating may generate vapors which may form explosive vapor/air mixtures. During fire, gases hazardous to health may be formed.

Special protective equipment and precautions for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Fire-fighting equipment/instructions In case of fire and/or explosion do not breathe fumes. Move containers from fire area if you can do so without risk.

Specific methods Use standard firefighting procedures and consider the hazards of other involved materials.

General fire hazards Combustible liquid.

Hazardous combustion products May include and are not limited to: Oxides of carbon.

6. Accidental Release Measures

Personal precautions, protective equipment and emergency procedures Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Wear appropriate protective equipment and clothing during clean-up. Do not breathe mist or vapor. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.

Methods and materials for containment and cleaning up Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Keep combustibles (wood, paper, oil, etc.) away from spilled material. Stop leak if you can do so without risk. Dike the spilled material, where this is possible. Cover with plastic sheet to prevent spreading. Absorb with earth, sand or other non-combustible material and transfer to containers for later disposal. Never return spills to original containers for re-use. Clean surface thoroughly to remove residual contamination. Following product recovery, flush area with water. Prevent entry into waterways, sewer, basements or confined areas. For waste disposal, see section 13 of the SDS.

Environmental precautions Do not discharge into lakes, streams, ponds or public waters.

7. Handling and Storage

Precautions for safe handling Keep away from open flames, hot surfaces and sources of ignition. When using do not smoke. Wash thoroughly after handling. Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Wear appropriate personal protective equipment. Do not breathe mist or vapor. Use only outdoors or in a well-ventilated area. Avoid contact with eyes, skin, and clothing. Pregnant or breastfeeding women must not handle this product. Avoid prolonged exposure. Use good industrial hygiene practices in handling this material. When using do not eat or drink.

Conditions for safe storag including any incompatibilities Store locked up. Keep away from heat, sparks and open flame. Store in a cool, dry place out of ect sunlight. Store in original tightly closed container. Store in a well-ventilated place. Store away m incompatible materials (see Section 10 of the SDS). Keep out of reach of children.

8. Exposure Controls/Personal Protection

Occupational exposure limits

Canada. Alberta OELs (Occupational Health & Safety Code, Schedule 1, Table 2)

Components	Type	Value	Form
Benzene, ethyl- (CAS 100-41-4)	TWA	543 mg/m3	
		125 ppm	
	STEL	434 mg/m3	
Carbon black (CAS 1333-86-4)	TWA	100 ppm	Respirable particles.
		3.5 mg/m3	e.
Ferric oxide (CAS 1309-37-1)		5 mg/m3	e
Hydrous magnesium silicate (CAS 14807-96-6)	TWA	2 mg/m3	
Naphtha (petroleum), heavy alkylate (CAS 64741-65-7)	TWA	1590 mg/m3	

Canada. Alberta OELs (Occupational Health & Safety Code, Schedule 1, Table 2)

Components	Type	Value	Form
Stoddard solvent (CAS 8052-41-3)	TWA	400 ppm	
		572 mg/m3	
		100 ppm

ACGIH Biological Exposure Indices

Components	Value	Determinant	Specimen	Sampling Time
Benzene, ethyl- (CAS 100-41-4)	0.15 g/g Creatinine *	Sum of mandelic acid and phenylglyoxylic acid	in urine	
Xylene (CAS 1330-20-7)	1.5 g/g Creatinine *	Methylhippuric acids	in urine	

* - For sampling details, please see the source document.

Exposure guidelines

Canada - Alberta OELs: Skin designation

Heavy aromatic solvent naphtha (petroleum) (CAS 64742-94-5)	Can be absorbed through the skin.
Solvent naphtha (petroleum), medium aliphatic (CAS 64742-88-7)	Can be absorbed through the skin.

Canada - British Columbia OELs: Skin designation

Heavy aromatic solvent naphtha (petroleum) (CAS 64742-94-5)	Can be absorbed through the skin.
Solvent naphtha (petroleum), medium aliphatic (CAS 64742-88-7)	

Canada - Manitoba OELs: Skin designation

Heavy aromatic solvent naphtha (petroleum) (CAS 64742- 94-5)
Solvent naphtha (petroleum), medium aliphatic (CAS 64742-88-7)

Canada - Ontario OELs: Skin designation

Heavy aromatic solvent naphtha (petroleum) (CAS 64742- 94-5)

Solvent naphtha (petroleum), medium aliphatic (CAS 64742-88-7)

Canada - Saskatchewan OELs: Skin designation Heavy aromatic solvent naphtha (petroleum) (CAS 64742-94-5)
Solvent naphtha (petroleum), medium aliphatic (CAS 64742-88-7)

US ACGIH Threshold Limit Values: Skin designation

Heavy aromatic solvent naphtha (petroleum) (CAS 64742- 94-5)
Solvent naphtha (petroleum), medium aliphatic (CAS 64742-88-7)

Can be absorbed through the skin.

Can be absorbed through the skin.

Can be absorbed through the skin.

Can be absorbed through the skin.

Can be absorbed through the skin.

Can be absorbed through the skin.

Can be absorbed through the skin.

Can be absorbed through the skin.

Can be absorbed through the skin.

Appropriate engineering controls Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. **Individual protection measures, such as personal protective equipment**

Upper/lower flammability or explosive limits

Eye/face protection	As required by employer code.
Skin protection	Where exposure guideline levels may be exceeded, use an approved NIOSH respirator. Respirator should be selected by and used under the direction of a trained health and safety professional following requirements found in OSHA's respirator standard (29 CFR 1910.134), CAN/CSA-Z94.4 and ANSI's standard for respiratory protection (Z88.2). Not applicable.
Hand protection	
Other	
Respiratory protection	
Thermal hazards	When using do not smoke. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. When using do not eat or drink.

Possibility of hazardous reactions Chemical stability

Conditions to avoid

Material is stable under normal conditions.

Incompatible materials

Avoid heat, sparks, open flames and other ignition sources. Avoid temperatures exceeding the flash point. Do not mix with other chemicals.

Hazardous decomposition products

Strong acids. Strong oxidizing agents. Halogens. Aluminum. Strong bases. May include and are not limited to: Oxides of carbon.

11. Toxicological Information

Routes of exposure

Information on likely routes of

Ingestion

Eye, Skin contact, Inhalation, Ingestion. **posure**

Inhalation

Droplets of the product aspirated into the lungs through ingestion or vomiting may cause a serious chemical pneumonia. May cause stomach distress, nausea or vomiting.

May cause damage to organs through prolonged or repeated exposure by inhalation. May cause drowsiness and dizziness. Headache. Nausea, vomiting. May cause irritation to the respiratory system.

Skin contact

Causes skin irritation.

Eye contact

Causes serious eye irritation.

Symptoms related to the physical, chemical and toxicological characteristics Hazardous polymerization does not occur.

Aspiration may cause pulmonary edema and pneumonitis. May cause drowsiness and dizziness. Narcosis. Headache. Nausea, vomiting. Behavioral changes. Decrease in motor functions. Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. May cause respiratory irritation. Skin irritation. May cause redness and pain.

Teratogenicity Components in this product have been shown to cause birth defects and reproductive disorders in laboratory animals. Xylene is considered fetotoxic in humans, based on observations of reduced fetal weight, delayed ossification and persistent behavioural effects in animal studies in the absence of maternal toxicity.

Specific target organ toxicity - single exposure May cause respiratory irritation. May cause drowsiness and dizziness.

Specific target organ toxicity - repeated exposure Causes damage to organs (central nervous system) through prolonged or repeated exposure.

Aspiration hazard May be fatal if swallowed and enters airways.

Chronic effects

Causes damage to organs through prolonged or repeated exposure. Prolonged inhalation may be harmful. Prolonged exposure may cause chronic effects. Significant lung effects have been observed in animals following exposure to airborne concentrations of Carbon Black of less than 100 mg/m3.

12. Ecological Information

Test Results	
100 mg/L, 48 Hours	7.711 - 9.591 mg/L, 96 hours

Persistence and degradability	No data is available on the degradability of this product.
Bioaccumulative potential	
Mobility in soil	No data available.
Mobility in general	Not available.
Other adverse effects	No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation

13. Disposal Considerations

Disposal instructions	Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Dispose of contents/container in accordance with local/regional/national/international regulations.
Local disposal regulations	Dispose in accordance with all applicable regulations.
Hazardous waste code	The waste code should be assigned in discussion between the user, the producer and the waste disposal company.
Waste from residues / unused products	Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).
Contaminated packaging	Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal.

14. Transport Information

Transport of Dangerous Goods (TDG) Proof of Classification	Classification Method: Classified as per Part 2, Sections 2.1 – 2.8 of the Transportation of Dangerous Goods Regulations. If applicable, the technical name and the classification of the product will appear below.
General	Canada: Marine Pollutants Exemption. 1.45.1. : Part 3, Documentation, and Part 4, Dangerous Goods Safety Marks, do not apply to substances that are classified as marine pollutants in accordance with section 2.43 of Part 2, Classification, if they are in transport solely on land by road vehicle or railway vehicle. However, substances may be identified as marine pollutants on a shipping document and the required dangerous goods safety marks may be displayed when they are in transport by road or railway vehicle. (SOR/2008-34, s. 23) US: DOT - 49 CFR 173.150 (f) - Combustible Liquid Exemption

CFR 171.4: The requirements of this subchapter specific to marine pollutants does not apply to non-bulk packagings transported by motor vehicle, rail car or aircraft, except when all or part of the transportation is by vessel.

U.S. Department of Transportation (DOT) Not regulated as dangerous goods.

Transportation of Dangerous Goods (TDG - Canada) Not regulated as dangerous goods.

15. Regulatory Information

Canadian federal regulations contains all the information req d in accordance with the hazard criteria of the HPR and the SDS uired by the HPR. **Canada CEPA Schedule I: Listed substance** 2-Butanone, oxime (CAS 96-29-7) Listed. Ferric oxide (CAS 1309-37-1) Listed.

Hydrous magnesium silicate (CAS 14807-96-6) Listed. **Canada**

DSL Challenge Substances: Listed substance

2-Butanone, oxime (CAS 96-29-7) Listed. Carbon black (CAS 1333-86-4)
